Rohan Iyer

Senior Product Designer | UX Strategy and Design Systems

rohan.iyer@example.com | +91 90000 12345 | linkedin.com/in/rohan-iyer-design | Chennai, India

PROFESSIONAL SUMMARY

Senior product designer with 7+ years of experience shaping B2B SaaS and commerce products from discovery through delivery. Combines user research, interaction design, prototyping, accessibility, and product analytics to solve complex workflow problems. Partners closely with product management and engineering teams to ship measurable improvements and scalable design systems.

CORE SKILLS

Product strategy, UX research, usability testing, journey mapping

Interaction design, information architecture, wireframing, prototyping

Figma, FigJam, design systems, component libraries, design tokens

Accessibility (WCAG), responsive design, mobile-first workflows

Product analytics, experimentation, stakeholder facilitation, handoff

PROFESSIONAL EXPERIENCE

Senior Product Designer

Northstar Digital — *2022 - Present*

- Led discovery and end-to-end design for a B2B order-management platform, reducing median task completion time by 28% in moderated usability studies.
- Established a Figma component library and token system adopted by four product teams, improving interface consistency and reducing duplicate UI work.
- Partnered with product analytics to define funnel events and run onboarding experiments; the redesigned setup flow increased activation by 16% over two releases.

Product Designer

Atlas Commerce — *2019 - 2022*

- Redesigned search, filtering, and checkout for a multi-category marketplace, improving successful mobile checkout completion by 12% in an A/B test.
- Interviewed customers and mapped service journeys to identify friction across discovery, cart, payment, and post-purchase support.
- Worked with engineering on responsive specifications, accessibility reviews, design QA, and iterative release validation.

PROFESSIONAL EXPERIENCE CONTINUED

UX Designer

Common Ground Studio — *2017 - 2019*

- Designed responsive account and reporting experiences for small-business clients, from early wireframes to production-ready interface specifications.
- Ran prototype tests with customers and translated findings into prioritized design changes for weekly product planning.
- Created reusable page patterns and annotated interaction states to improve developer handoff and reduce review cycles.

SELECTED PROJECTS

Merchant Onboarding

A guided setup experience for new sellers configuring products, payments, and delivery preferences.

- Simplified a multi-step workflow using progressive disclosure, inline validation, and clear completion states.
- Validated the prototype with first-time sellers and partnered with engineering on staged rollout and analytics.

Unified Design System

A shared component library and usage guidance for a growing SaaS product suite.

- Audited duplicated patterns and prioritized accessible foundations, form controls, navigation, and data displays.
- Documented responsive behavior and interaction states to support consistent design and implementation.

EDUCATION

Bachelor of Design, Communication Design

National Institute of Design — *2017*

CERTIFICATIONS AND LANGUAGES

Google UX Design Professional Certificate — *Google, 2021*
